FINLAND

## Luna

Luna is a value-for-money, low maintenance GPS personal security alarm solution that is convenient for people working or traveling in various circumstances. Luna uses your own Android phone for sending the alarms and so does not require extra monthly charges for the use or a separate subscription.

Multiple Luna button can also be connected to one Android device making the solution suitable for ticket offices etc.

**Funding Received** : Yes

**Product** : Wearable personal security alarm

**Founded In** : 2016

## KEY BENEFITS

- Improve Safety
- Leverage Remote Experts
- Shorten Communication Loops

## RELEVANT INDUSTRIES

- Services
- Manufacturing
- Transportation & Infrastructure

## USE CASE

- Lone worker safety
- Traveling in non-secure areas
- Service counter safety

## This is how Luna works

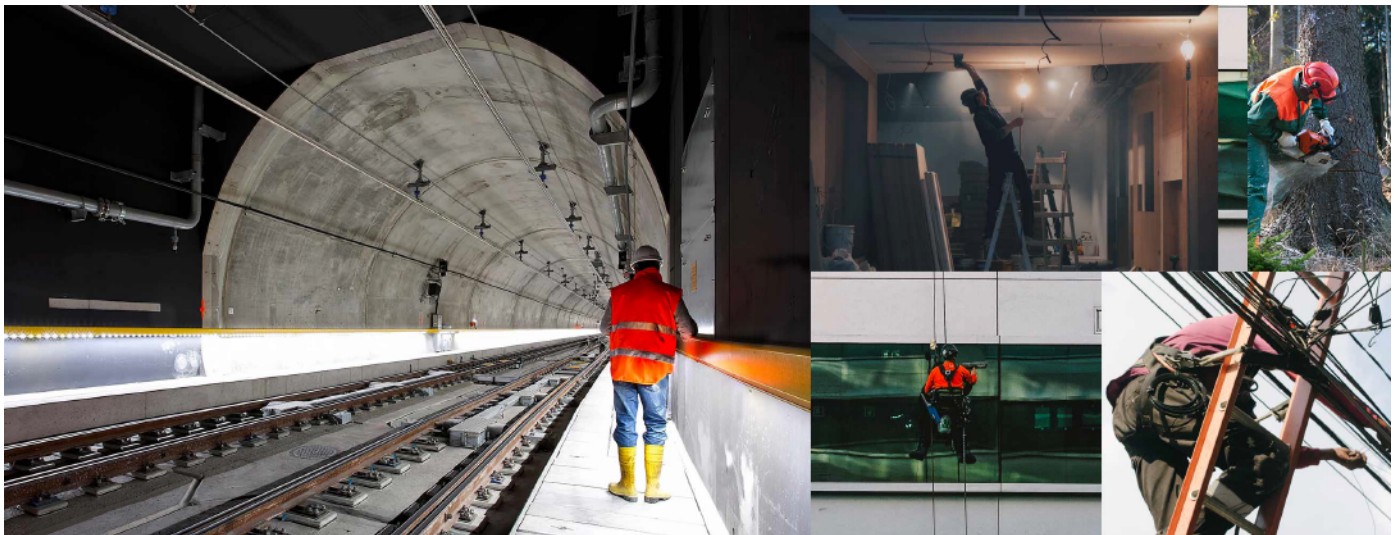

User presses Luna alarm button

LunaSafe mobile app resolves the GPS location

LunaSafe sends an **SMS with GPS GoogleMaps link** and personalized **message** to selected contacts

LunaSafe makes a loudspeaker voice call to selected contacts

LunaSafe wearable alarm is an inconspicuous device, keeping you safe at all times and connected in case of emergency. If something unexpected happens or you find yourself in a threatening situation, tap LunaSafe to send distress message and make an automized call to your contacts.

Luna can be worn as bracelet or necklace, clipped to your pocket or belt, or discreetly stored in your bag. For office spaces magnetic wall mount is also available.
