

Some of our Customers

Automotive Sector

FCA a leading company in the automotive sector. It is using the Brochesia B View solution on-premises to support the maintenance and interventions in their industrial production facilities as well as in the Academy for training purposes e.g. their technicians that need to be trained on how to operate in the car production lines.

Magneti Marelli, multinational company specialized in the supply of high technology products and systems for the automotive industry, currently uses the solution in two plants in Italy for assistance/support and training in production lines (exhaust systems in the first case, suspension in the second one).

Miba Group (Austria) including its subsidiaries in Brazil, USA, China, Slovakia, is a leading group to the international engine and automotive industries. The products in portfolio includes sintered components, engine and industrial bearings, friction materials, power electronics components and coatings, used around the world in motor vehicles, trains, ships, aircraft, power plants, refineries, compressors and industrial. Miba Group has adopted in those countries B

View on-premises to allow to provide support to technicians working in the production lines, carrying out quality tests as well as being able to provide training on the job

Energy Sector

Enel Green Power is an Italian multinational renewable energy corporation. Enel Green Power had operations in over 30 countries across the five continents. It generates energy from hydropower, wind, solar, geothermal, and biomass sources.

Enel Green Power has adopted Brochesia B View in order to improve the communications and working interactions between workers located in different geo locations and to facilitate problem resolution or performing site surveys in the energy plants.

L&T Group: Indian Group Larsen & Toubro use Brochesia Solution for certifications, quality control, on site services (including support) and site inspections and maintenance. Many companies within the L&T Group have adopted B Safe.

L&T Power, provides integrated solutions for Thermal, Energy and Gas-based power plants including power plants construction.

L&T Hydrocarbon Engineering serves the Oil and Gas sector around the world. Organised under Offshore, Onshore, Construction Services, Modular Fabrication and Engineering Services verticals, the company delivers 'design to build' engineering and construction solutions across the hydrocarbon spectrum.

Telecommunication Sector

Vodafone: leading Telco Company in the market uses the Brochesia B View solution to support technicians for maintenance activity, for equipment commissioning quality checks as well as training on the jobs that are carried out on wireline and wireless telco plants.

Ericsson Italy, world leader in the Telecommunications industry, has chosen the Brochesia B View solutions for the practicality of its use. It allows to intervene to solve faults in the Telco equipment hands-free, decreasing intervention times and costs as well as for site surveys.

open fiber

5G Trial with Wind3 and Enel Open Fiber: Brochesia is partner

in the consortium that is trialing 5G communication technology in both Prato and L'Aquila cities in Italy. Brochesia takes part to different real uses cases in the following sectors healthcare, security, automotive, cultural heritage and museums. B View has been already successfully tested in conjunction with 5G technology .

Construction Sector

L&T Group: Indian Group Larsen & Toubro use Brochesia Solution for certifications, quality control, on site services (including support) and site inspections and maintenance. Here are the company of the group that use our Solution.

L&T Construction capabilities span the entire gamut of construction - civil, mechanical, electrical and instrumentation engineering - and its services extend to all core sector industries and infrastructure projects.

L&T Realty makes available in the form of premium residences construction expertise.

TSM, products and technological solutions for metal scraping and naval maintenance and constructions. B View is being used to carry out maintenance and installation in the ships.

Medical Sector

118 Puglia/Bari – Brochesia B Med is used in emergency first responses on ambulances in the Italian region Puglia.

Production Sector

Coffee Production

Lavazza, Italian company, producer of roasted coffee and coffee machines. B View is used to assist both maintenance activities and intervention on Lavazza production lines (e.g. coffee, capsules, coffee machines)

Industrial Equipment Production

Schleich, a company, based in Germany, has adopted the Brochesia B View solution to support commercial customers, partners and service points in case of technical difficulties in the use of the industrial equipment they produce and export worldwide.

Steel Production

SISCOL, Indian company that operates in the steel industry has adopted B Safe for carrying out plant site surveys, quality checks in the production environment.

Oil & Gas, Power, Petrochemicals, Chemicals, Water, Defence and Aerospace Production

SIBUR is the largest integrated petrochemicals company in Russia. It sells its petrochemical products on the Russian and international markets in two business segments:

- Olefins & Polyolefins (polypropylene, polyethylene, BOPP films, etc.)
- Plastics, Elastomers & Intermediates (synthetic rubbers, EPS, PET, etc.). Sibur has adopted B View that is being used:
- During the commissioning process ie new machines are provided in the production plants and Sibur technicians perform the quality checks that the installation by their suppliers has been done according to the highest quality standards
- During maintenance or problem solving activities in the production plants

L&T Group: Indian Group Larsen & Toubro use

Brochesia Solution for certifications, quality control, on site services (including support) and site inspections and maintenance. Here are the company of the group that use B Safe Solution.

L&T MHPS manufacturing facility for Pressure Parts and Pulverizes for super critical boilers.

L&T Valves is a leader in flow-control solutions, to manufacture valves for key sectors of the economy such as oil & gas, power, petrochemicals, chemicals, water as well as defense and aerospace.

L&T Heavy Engineering manufactures and supplies custom designed equipment & critical piping to process industries such as fertilizer, chemical, refinery, petrochemical, and oil & gas, as well as to sectors such as thermal & nuclear power, aerospace and defence

Cooling Systems Production

Established in 1921, **Nissens** has decades of experience with the design and manufacturing of customized cooling solutions for industrial applications and for on- and offshore applications in the wind turbine industry. Nissens has production and assembly facilities in Europe, China and Americas and offer global engineering. Brochesia B View allows several

sites to cooperate with their teams, anywhere in the world, optimizing the costs and the time needed for the activities such as maintenance and problem solving.

Maintenance Sector

MIPRO (Finland), provide maintenance and support via Brochesia B View in transportation, water treatment and safety and security
