

Who we are

The continuous attention to ***ICT*** issues and ***technological innovation*** has allowed the development, within TransTec Services, of "***Brochesia***", a new brand dedicated to the ideation, experimentation, design and development of software solutions totally integrated with next-generation wearable devices.

<<Software solutions for wearable device>>

What we do

Our **goal** is to make the best use of the functional advantages that are typical of wearable devices, such as the **miniaturization of technology** and the ability to perform normal daily tasks while keeping your hands free, to allow companies in the context of **4.0 Industry** and **Health organizations** to cooperate with their teams, anywhere in the world, **optimizing the costs** and the time needed for the activities, especially thanks to the support of **Augmented Reality**.

Our solutions

Remote Support

Logistic Support

Security Services

Media Support

Medical Support

Survey Activities

Features(1)

-  Audio/Video streaming
-  Multiconference between 3 users
-  Augmented Reality (AR)
-  Brochesia Cloud
-  Real time visualization of images and contents
-  Audio/Video Recording
-  Dedicated web portal

Features(2)

Mirroring

Marker/laser Pointer

Free and multicolor Drawing

Web Chat

GPS – Device Location Map

Media Sharing

Creation of contents

Screenshot and image editing

Torgia LED

The innovative solution integrates the technology with the Smart Glasses to facilitate and optimize communication between a field technician and an expert operator who remotely supports the technician step by step.

Application fields

*The technician on site **broadcasts** live following directions from a remote operator*

- ✓ Support for plant and machinery maintenance

*Remote support **watches in live stream** what the technician sees and can offer support thanks to the portal*

- How can he help him?

Edit images, chat, File sharing, Anchoring images

Application fields

Remote support **watches in live stream** what the technician sees and can offer support thanks to the portal.

- How can he help him?

Edit images, chat, File sharing, Send images in AR

The technician on site **broadcasts live** following directions from remote operator

- ✓ Support for artisans and/or industrial production

Application fields

Remote support watches in live stream what the new worker sees and can help him, sharing the same environment.

- ✓ Educating and training of new workers

The new worker follows directions from remote support

Application fields

Remote support **watches in live stream** what the technician sees and can offer support thanks to the portal. He can access to the Brochesia Cloud and **share files**

- ✓ Inspection activities

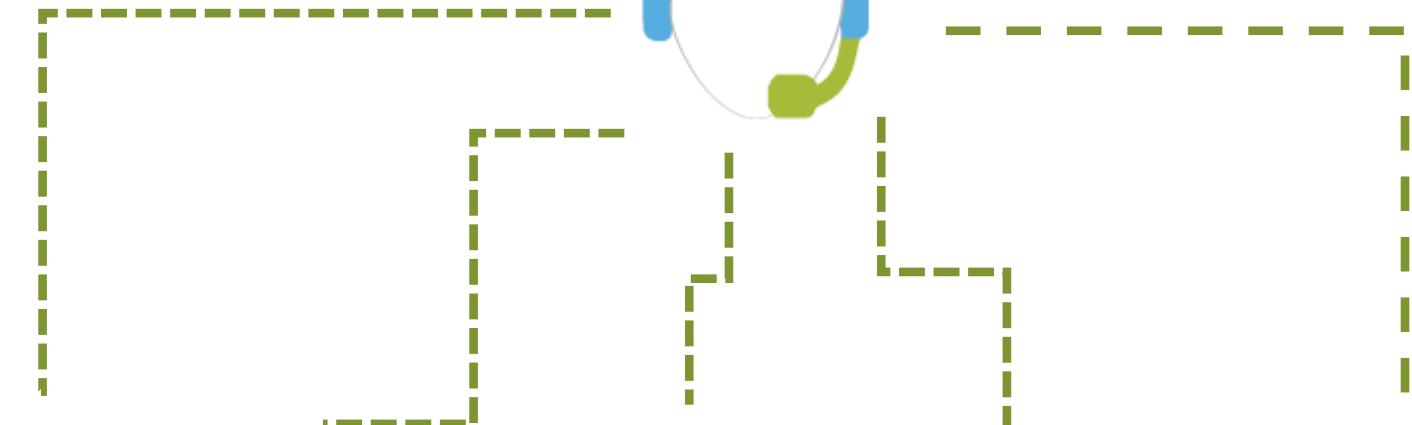

The technician on site **broadcasts live** following directions from remote support

Benefits

- Improving productivity and maintenance system
- **Reduction of times and costs** for intervention activities
- Manage more activities simultaneously
- Training
- Documentation of activities in **real time**
- Creation of contents (e.g. Tutorials)
- Consequently to the minimization of the resources' transfers, the **reduction** of the production of CO₂.

Thanks to the experience with B View
our team has modulated the solution to
use it in different sectors

Logistic Support

Security Services

Media Support

Medical Support

Inspection

B Take
Logistic Support

The innovative solution integrates the technology with the Smart Glasses to optimize goods management processes, making all the useful information available to the operator at any time and the reading of barcodes and QR-codes

Application fields

- ✓ Picking
- ✓ Cataloguing
- ✓ Monitoring the warehouse flow system
- ✓ Goods storage

Benefits

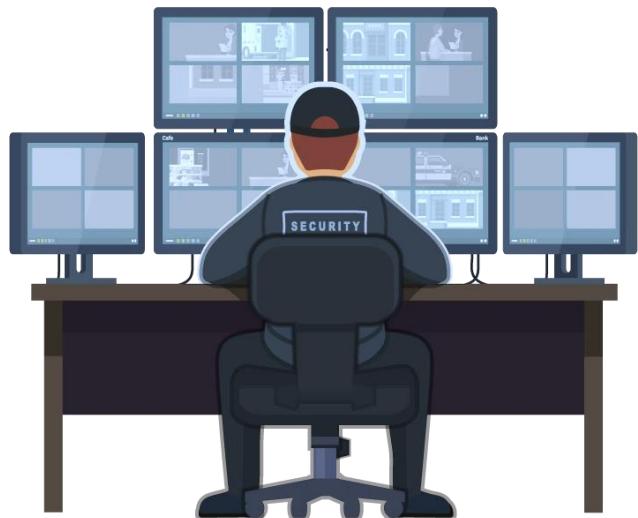

- Great freedom of movement and the ability to work with both hands free
- Reduction of times and costs for intervention activities
- Manage more activities simultaneously
- Reducing the number of errors
- Intuitive graphical user interface design

Support for security services

The solution helps the police or security personnel to receive audio/video documents and eases direct communications between the agents and the operation center.

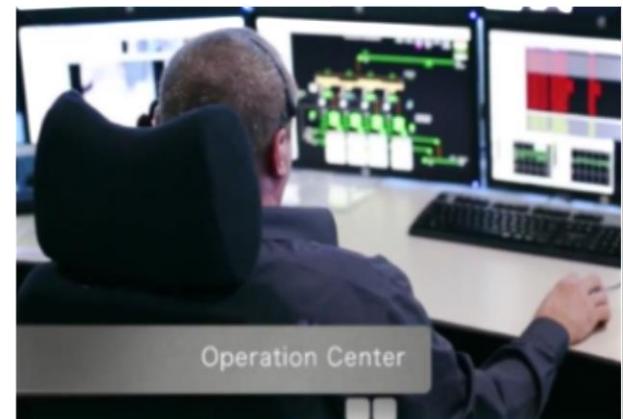

*The agent on site **broadcasts live following directions** from remote support*

Application fields

*Remote support **watches in live stream** what the agent sees and the operator can support him/her thanks to the web portal*

- ✓ Security staff's monitoring and checking

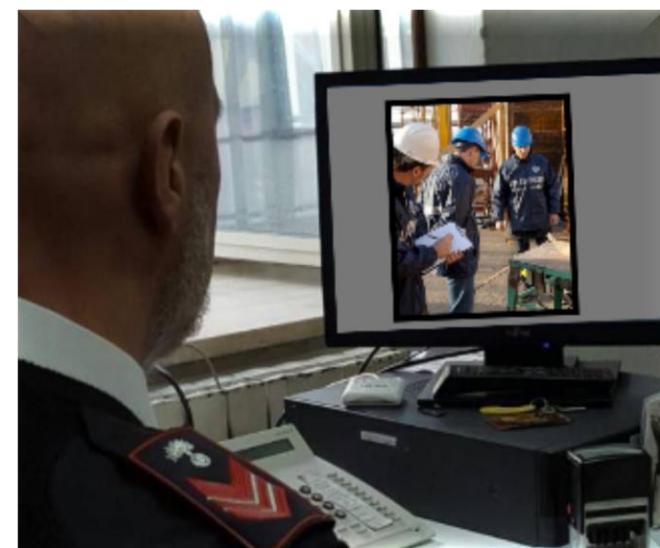

Application fields

The agent on site **broadcasts live following directions** from remote support

Remote support **watches in live stream** what the agent sees and the operator can support him/her thanks to the web portal

- ✓ Inspection activities

Remote support watches in live stream what the agent sees and the operator can support him/her thanks to the web portal

- ✓ Police and agents on site

Application fields

*The agent on site **broadcasts live** following directions from remote support*

Application fields

*The new agent on site **broadcasts live following directions** from remote support*

*Remote support can train new agents from distance. The support **watches in live stream** what the agent sees and can support him/her with web portal*

- ✓ Educating and training new agents

Benefits

- Reduction of times and costs for intervention activities
- Manage more activities simultaneously
- Training
- Documentation of activities in real time
- Creation of contents (e.g. Tutorials)
- Consequently to the minimization of the resources' transfers, the reduction of the production of CO₂.
- Media producing, recording, sharing
- Optimization of service efficiency
- Improvement of the workforce experience

Media support

The solution was designed to allow journalists, reporters, tour operators to report on live streaming, record audio/video files and save them directly to Brochesia Cloud, all from the Smart Glasses device

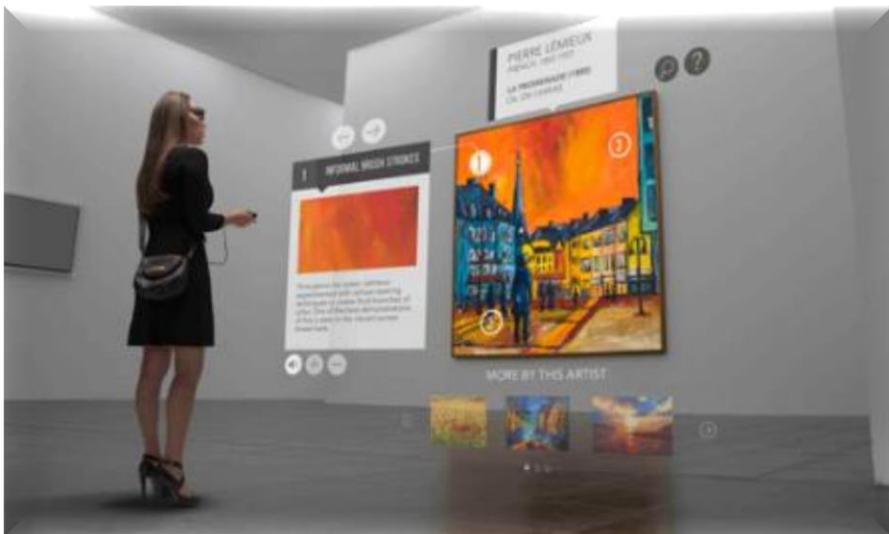

Application fields

- ✓ Broadcast live streaming
- ✓ Reportage/interviews
- ✓ Video footage for post production
- ✓ Activities for the promotion of tourism
- ✓ Guides tours from remote

Benefits

- Museum visits from remote
- Documentation of activities in **real time** (the session can be recorded on the Brochesia Cloud in the form of videos and photos. The files can be shared and viewed both in real time and later on).
- Creation of contents (e.g. Guided tours)
- Consequently to the minimization of the resources' transfers, the **reduction** of the production of CO₂.
- Media producing, recording and sharing

B Med is a software solution for the specific needs of the healthcare and medical sectors, which allows and facilitates audio/video communication between the medical personnel and remote staff or patients, while sharing the surrounding scene through Augmented Reality (AR). It's possible to send files and display medical reports with secure data transfer. The *typical* wearability of this kind of devices, allows great freedom of movement and the possibility of operating while keeping your hands free.

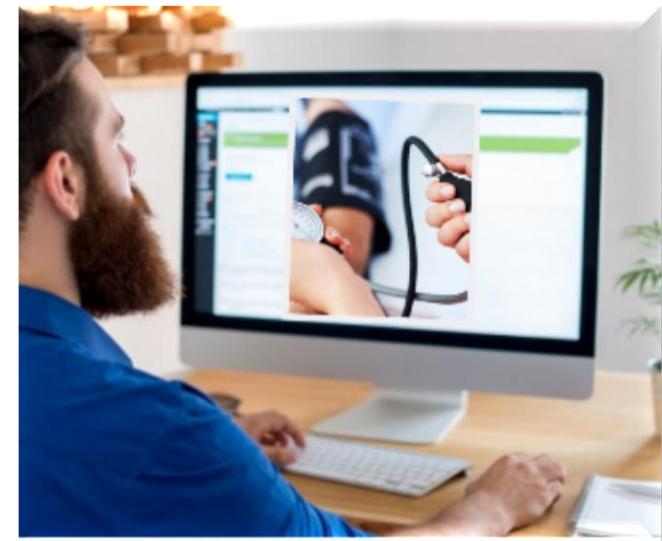

Application fields

*The medical operator on site
broadcasts live following
directions from remote
support*

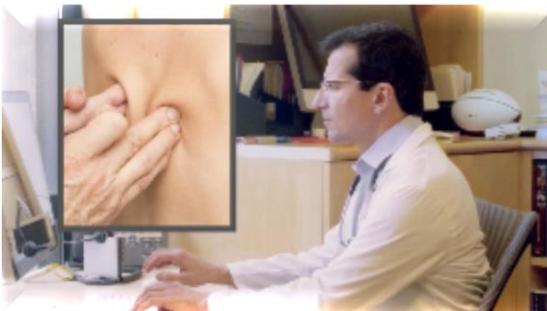

*Remote support **watches**
in live stream what the
medical operator sees and
the operator can support
him/her thanks to the web
portal*

- ✓ Medical training

Application fields

Remote support, usually a doctor with experience, can support the medical operator from distance. The doctor watches in live stream and can help the medical operator thanks to the web portal

The medical operator on patient's home broadcasts live following directions from remote support

- ✓ Home assistance

Applications fields

*Remote support, usually a doctor with experience, **watches in live stream** what the surgeon sees and can support the surgeon thanks to the web portal*

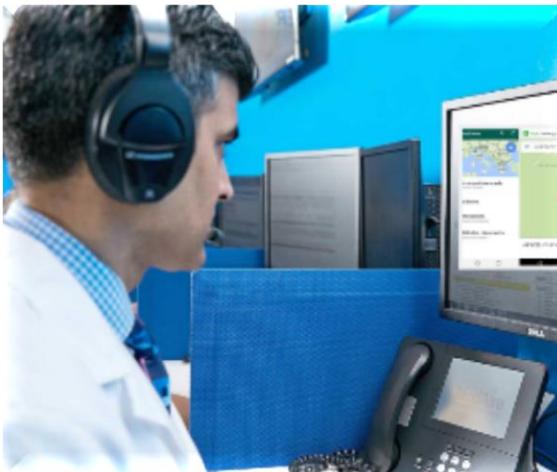

*The surgeon on site **broadcasts live** following directions from remote support*

- ✓ Support in the operating room

Application fields

*Remote support **watches in live stream** what the medical operator sees and can support him thanks to the web portal: File sharing, Sending images in AR, Sending textual messages, Video/Audio streaming*

*The medical operator on site **broadcasts live** following directions from remote support*

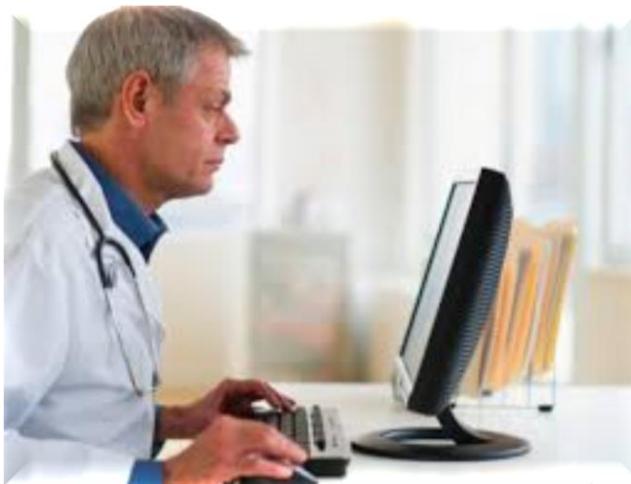

- ✓ First Aid

Application fields

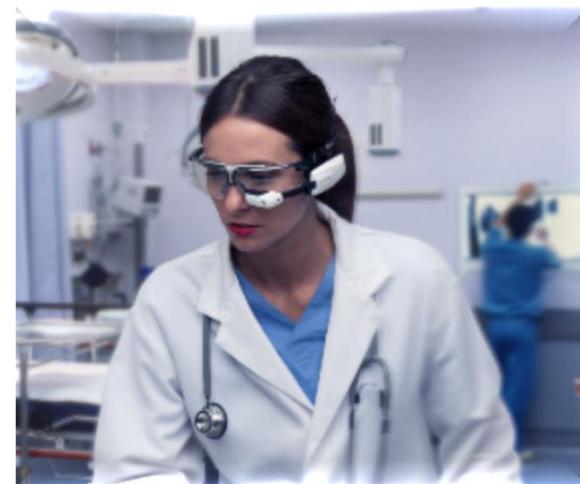

Remote support **watches in live stream** what the doctor sees and can support him with web portal.

File sharing, secure transfer data, recording video

The doctor on site **broadcasts live** following directions from remote support.

B Med allows a great freedom of movement and the ability to operate while having both **hands free**

- ✓ Emergency room

Application fields

*The apprentice can **watch in live stream** thanks to the web portal. It's possible to make medical updates **from remote***

- ✓ Medical e-learning

*The doctor on site broadcasts **live** and explains to **remote** students.*

Application fields

The remote support and the technician can share the same environment and collaborate from distance, in real time

- ✓ Control and maintenance activities of medical equipment

Benefits

- Great **freedom of movement** and the ability to operate with both **hands free**
- Reduction of **times** and **costs** for intervention activities
- Manage more **activities simultaneously**
- Training
- Documentation of activities in **real time**
- Creation of contents (e.g. Tutorials)
- Share files registered and view the medical reports
- Medical device sharing
- Secure data Transfer

Survey Activities

This software solution is ideal for testing activities, for insurance appraisals, inspections, certifications, verifications on site and usability of public and private buildings (schools, houses, churches, historical monuments), activities that require a high quantity of qualified technicians operating in the field.

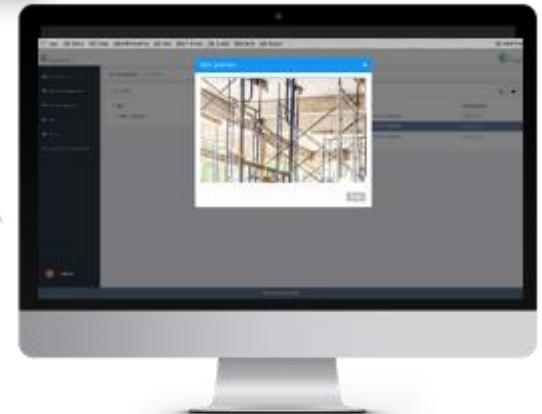

Survey Activities

- ✓ Testing activities
- ✓ Insurance appraisals
- ✓ Inspections
- ✓ Certifications
- ✓ Auditing

Inspection

Benefits

- Great **freedom** of movement and the ability to work with both **hands free**
- Real time Audio/Video Assistance
- Improving productivity and maintenance system
- **Reduction of times and costs** for intervention activities
- Manage more **activities simultaneously**
- Training
- Reducing the number of errors
- Documentation of activities in **real time**
- Creation of contents (e.g. Tutorials)
- Consequently to the minimization of the resources' transfers, the **reduction** of the production of CO₂.

Some benefits of our solutions

Application user friendly

Application fields

Thanks to Brochesia it is possible to share the same point of view from remote and support colleagues and / or customers in different parts of the world and with different fields of application, such as:

Production support

Inspection

Support to public and private security services.

Specialized health care

Specialized 4.0 Industry

Co-working

E-Learning

Maintenance support

Training on site

Our strengths

1. Partnership with the main producers of smart glasses and compatibility with most devices on the market: Epson, Realwear, Vuzix
2. Recognised as technological leaders from our international partners
3. Web-based solutions on Brochesia Cloud and available on-premises too (installation by the customer)
4. A low band in video/audio streaming in HD is sufficient – the quality adapts according to the available band
5. Easy to use
6. Solution that adapts for being used in different sectors: easy verticalization
7. Creating contents and real-time sharing
8. Network for trading partners in Europe, Asia and South America
9. Modular solution that allows us to offer it in various ways, including on consumption

Brochesia has already successfully trialed
5G communication technology
