CONNECTED WORKER AND DIGITAL FACTORY

CONNECTED

WORKER

Introduction

¿WHY ZERINTIA?

Flexibility to customize for requirements not already supported by our standard solutions

Ability to integrate our solutions with customer systems

HW independence and ease of incorporating new best-in-class devices in the future

Innovative projects in leading sectors and companies at national and international level

Roadmap of new versions with functionalities in continuous growth (business based on OPEX)

Recognition as experts and pioneers in wearable and IoT technologies

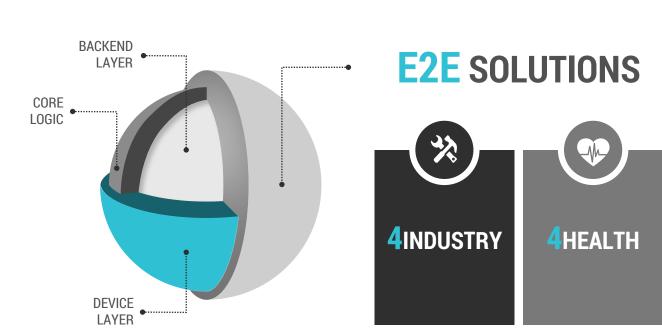

Positive balance between functionalities offered and price positioning

Flexibility in the commercialization model to adapt to the needs of each company

Our customers trust **ZERINTIA** to develop their **DIGITAL roadmap** because they are looking for technological partners who provide a **robust**, **flexible** and **future-oriented TECHNOLOGICAL ARCHITECTURE** on which to deploy their **digital strategy** in a **progressive**, **integrated** and **homogeneous** way

4.0

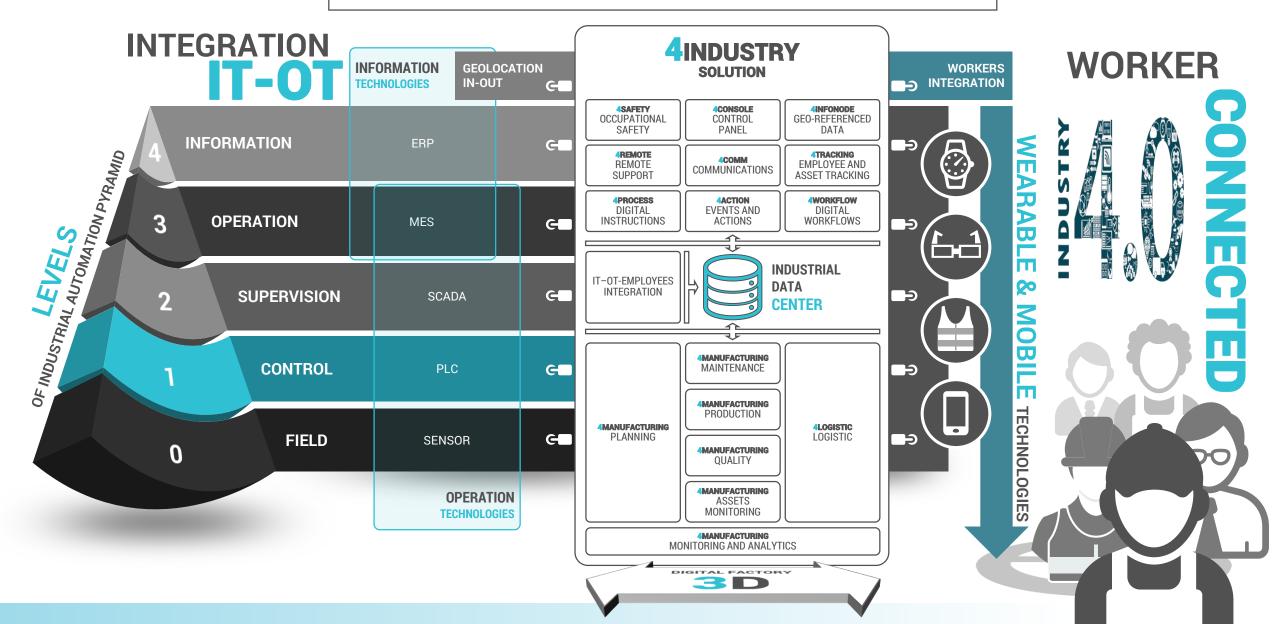

CONNECTED WORKER AND DIGITAL FACTORY

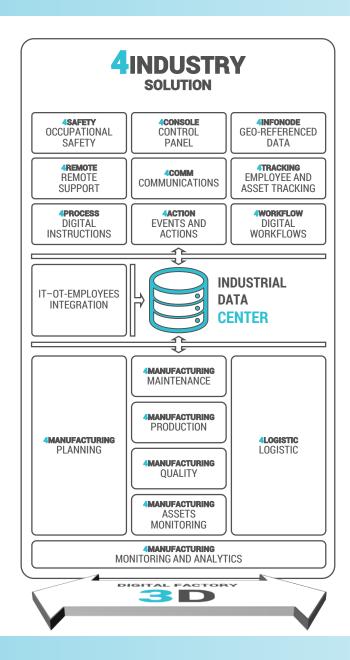

4INDUSTRY integrates and **orchestrates** all the **physical**, **logical** and **human** elements of the industrial company, making available to **connected employees and managers** all the **IT-OT information** they need to perform their work **efficiently**, **safely** and **assisted**.

Main modules in 4INDUSTRY solution

4REMOTE REMOTE SUPPORT

Make sure your employees are not alone

All-in-one solution for **communication** with **experts and supervisors remotely**, sharing **video/audio** in real time to **solve** doubts and incidents or to **check** the work done

Employee - ORP certifier communication to carry out work safety checks remotely, without travelling and generating evidence from the first moment even in the event of an accident

Control tower - confined spaces communication to remotely supervise, advise and monitor employees performing risky activities in confined spaces

4PROCESS DIGITAL INSTRUCTIONS

Make sure your employees handle even the most complex processes

Integral solution for **design and execution of processes** into the factory or on the move, with **digital step-by-step instructions** and **real-time and remote monitoring of active processes**

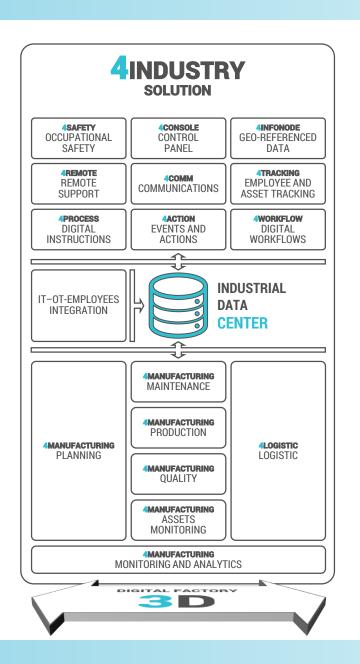

Notice, compliance record and traceability of mandatory PPE in areas and/or when performing certain operations by employees

Employee support with **step-by-step instructions** on process execution (**security, maintenance, quality, changeover**, etc.) and video, photo, diagram, etc. aids

Main modules in 4INDUSTRY solution

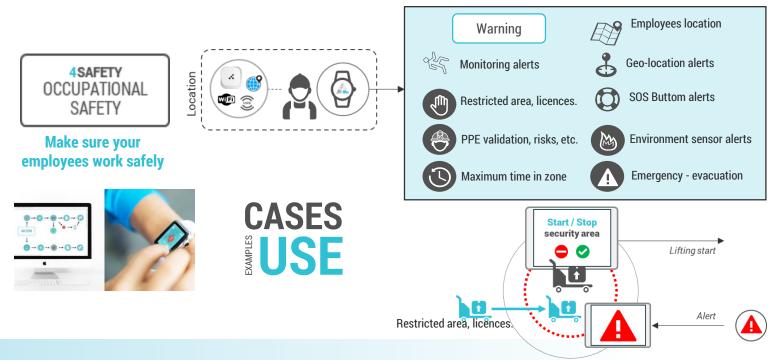

4ACTION EVENTS AND ACTIONS

Make sure your process are managed safely

Solution for the **integration of IT-OT-EMPLOYED** data, **real-time event detection** based on these data and configurable rules, and finally **launching defined actions** for them

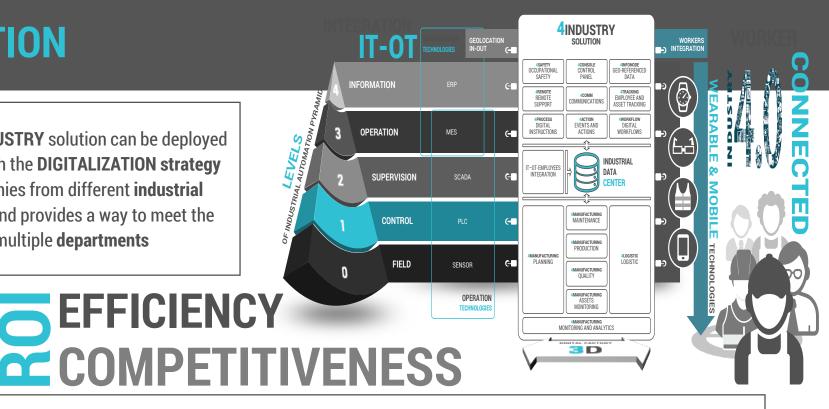

CROSS INDUSTRY & FUNCTION

Our **4INDUSTRY** solution can be deployed in line with the **DIGITALIZATION strategy** of companies from different industrial sectors, and provides a way to meet the needs of multiple departments
