SMART. SAFE. MĀKUSAFE.®

MAKING THE WORLD SAFER THROUGH TECHNOLOGY & DATA

MākuSafe® is an Insurtech SaaS/Data company focused on improving workplace safety and reducing worker compensation claims. MākuSafe® gathers real-time environmental, motion, and near-miss data from connected devices, including their proprietary wearable technology. That data is then sent to their cloud platform, MākuSmart®. The platform uses machine learning analytics to identify high-risk trends in the facility, generate alerts, and acts as a communication portal for insurance carriers to provide loss control resources to their customers.

FEATURES

- Analytics and reporting dashboard for both end-users and carriers
- Machine Learning identifies high risk trends and suggests remediation actions
- Device identifies leading indicators and auto-detects near misses
- Collects environmental and human motion data, including slips, trips & falls
- Voice operation for self-reported near misses
